

La Selva OTS Checklist and nearby sites in the Sarapiquí region of the Caribbean lowlands, 100-300 ft.

LOCATION CODE

- [W] Widespread: species can be found in more than one habitat zone.
- [S] Secondary growth: species that favor disturbed areas, incl forest patches.
- [P] Primary Forest: species that are rarely found out of undisturbed forest.
- [N] Near water: species that favor rivers, ponds, and marshy areas.

ABUNDANCE CODE

- 1 = Should be seen daily, generally a hard species to miss.
- 2 = Should be seen on most days of a visit to that particular habitat.
- 3 = Somewhat less common, but should still be seen. Requires some effort.
- 4 = Species is uncommon or of erratic occurrence. Generally tricky to find.
- 5 = Species is rare, seen annually, but few records per year. You'll need luck!
- 6 = One or two records only, not to be expected. Confirmation needed.

h = Heard considerably more often than seen

n = Migrants from North America, mainly present Sept through May.

s = Migrants from South America, mainly present March through Sept.

t = Transient migrants, mainly present from March through May and Sept through Nov.

d = Present mainly in dry season, Jan through May.

r = Present mainly in rainy season, May through Dec.

Areas included: La Selva OTS, El Gavilan Lodge, Selva Verde Lodge, La Quinta Lodge, El Tigre Marsh, and all areas between these lodges including Puerto Viejo and the Sarapiquí River.

This checklist represents all of the most likely seen species including significant rarities. It is not comprehensive in that it does not include all accidental species or species seen in the foothills on La Selva OTS property which is not accessible to the public.

We welcome new information on species not included in this list or about species with abundance codes 5 or 6. Please send details to Kevin Easley: ticokid@racsa.co.cr
